COMPANY PROFILE · 2026

Engineering Digital Solutions That Move Businesses Forward.

Custom software, web and mobile apps, enterprise platforms, analytics and automation, delivered by a team certified to ISO 9001:2015 and ISO 27001:2022.

- Custom Software
- Web & Mobile Apps
- Enterprise Solutions
- Power BI & Analytics
- AI Automation

WHO WE ARE

A technology partner, not just a vendor

SGR Software Solution is an engineering-led company in Greater Noida, India. We design, build and support custom software, web and mobile apps, enterprise platforms and analytics for startups, growing businesses and enterprises.

What we do

Software, apps, ERP / CRM, Power BI, AI automation and long-term support.

What clients gain

Systems that replace spreadsheets, real-time visibility and room to grow.

How we partner

A shared roadmap, agile sprints, regular demos and support after go-live.

CERTIFIED & STRUCTURED

ISO 9001:2015

WHY CLIENTS CHOOSE SGR

Business outcomes first, engineering second

Outcome-led engineering

We start from the result you need, then choose the technology.

Proven in live systems

Healthcare, solar, logistics and analytics platforms in daily use.

One partner, full lifecycle

Discovery to support under one accountable team.

Security and quality by process

ISO 9001:2015 and ISO 27001:2022 certified, with role-based access built in.

Transparent communication

Dedicated agile team, weekly updates and regular demos.

Built to grow

Modular, API-first, cloud-ready, with post-launch support.

WHAT WE DO

Six capabilities, one accountable team

Custom Software & Enterprise Applications

Bespoke platforms that automate complex workflows and scale with your business.

- Workflow automation
- Microservices

Web & Mobile App Development

Fast, secure web apps and iOS / Android apps with a polished experience.

- React / Next.js
- Flutter

CRM, HRMS, ERP & Workflow Automation

Connected business systems that replace manual hand-offs and spreadsheets.

- CRM & ticketing
- HRMS

Power BI & Business Intelligence

Live dashboards and automated pipelines that turn data into decisions.

- Power BI
- ETL pipelines

AI Solutions, Cloud & API Integrations

Practical AI automation, cloud-native hosting and integrations that connect your stack.

- AI automation
- REST & GraphQL

QA, Maintenance & Technical Support

Rigorous testing and SLA-backed support that keeps products reliable.

- Automated QA
- Security audits

SERVICES IN DEPTH

What we build and what you gain

Capability	What we build	What you gain
Custom Software & Enterprise Applications	Workflow automation, multi-tenant SaaS, role-based portals and API-first back ends.	Less manual effort and one source of truth.
Web & Mobile App Development	Responsive web apps, e-commerce, CMS and cross-platform mobile apps with offline sync.	A better customer experience, faster to market.
CRM, HRMS, ERP & Workflow Automation	Ticketing and CRM, HRMS, warehouse and logistics ERP, approvals, Salesforce and SAP integration.	Connected teams and real-time visibility.
Power BI & Business Intelligence	Executive dashboards, SQL / ERP / API pipelines, KPI scorecards and drill-down reports.	Faster decisions, no manual Excel reporting.
AI Solutions, Cloud & API Integrations	AI-driven automation, REST / GraphQL APIs, third-party integrations, CI/CD deployments.	Smarter workflows and systems that scale.
QA, Maintenance & Technical Support	Functional, regression, performance and security testing, plus monitoring and patches.	Fewer defects and protected uptime.

The right stack for the job

Frontend & UI

React

Next.js

Vue.js

Angular

TypeScript

Tailwind

Bootstrap

Backend & APIs

Laravel

PHP 8

Node.js

Express

Python

.NET Core

Java

Firebase

Cloud, analytics and quality tooling

Cloud & DevOps

- AWS
- Docker
- Kubernetes
- CI/CD

Analytics & Enterprise

- Power BI
- Tableau
- Salesforce
- SAP
- SQL

Quality & Testing

- Selenium
- Cypress
- JMeter
- API tests
- Security

HOW WE CHOOSE

API-first and modular by default. Secure by design. Automated testing and CI/CD from the first sprint, so what we build is easy to run, extend and hand over.

SELECTED PROJECTS

Delivered for clients across industries

Selected platforms from our delivered portfolio.

GNX Power Solution Solar & Energy	**Doctor Hunt** Healthcare	**Warke Dental** Dental practice SaaS	**Hospital Management** Healthcare
Logistic Management System Logistics	**Warehouse Platform** Supply chain	**Estore** E-commerce	**Restaurant Performance** Hospitality analytics

CASE STUDY 01 · SOLAR & ENERGY

GNX Power Solution

Operations platform for a solar service business

Illustrative interface

Key features

- Ticketing and breakdown tracking
- AMC and warranty lifecycle
- Loan workflow with KYC checks
- Role-based access control

The challenge

Breakdowns were logged by phone, AMC and warranty records sat in spreadsheets, and loan paperwork was slow.

The solution

A live ops dashboard with technician dispatch and SLA tracking, an AMC and warranty engine, and a digital loan workflow.

WHAT CHANGED

From phone tickets and spreadsheets to one live platform for service, contracts and financing.

Technology stack

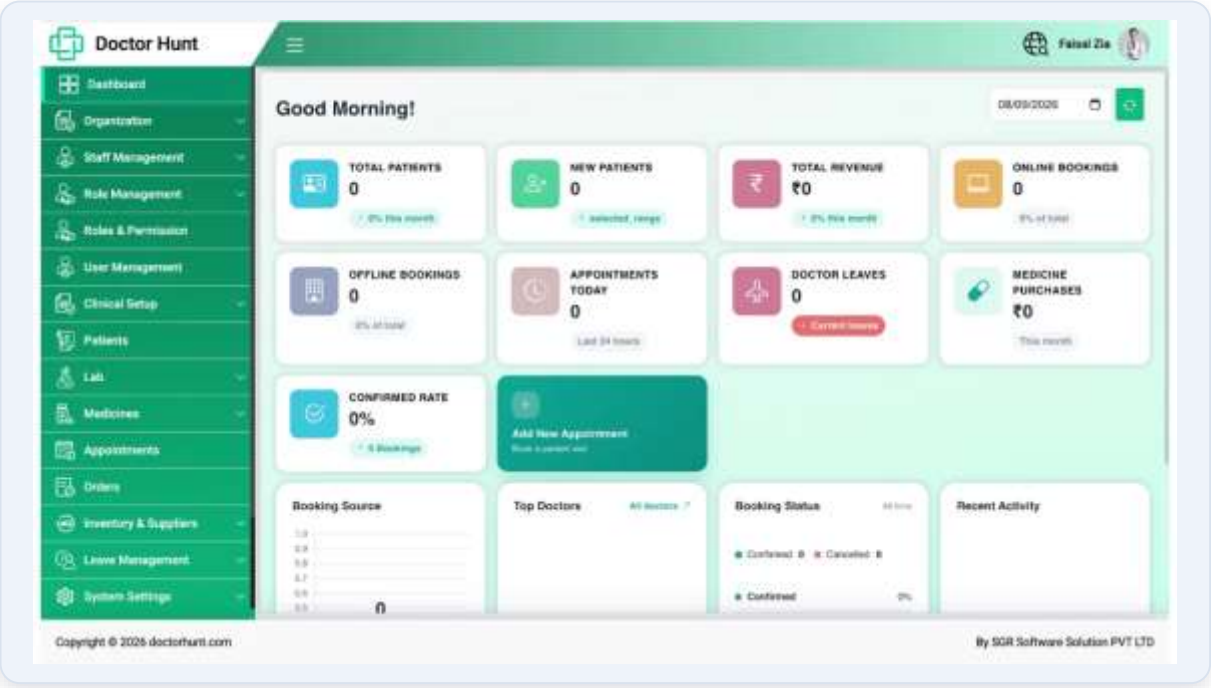
React.js · Node.js · Express · MySQL · Tailwind · REST API

gnxpowersolution.com

CASE STUDY 02 · HEALTHCARE

Doctor Hunt

Clinic management SaaS with teleconsultation



Illustrative interface

Key features

- Smart appointment scheduling
- Live queue and token tracking
- Electronic medical records
- Video teleconsultation

The challenge

Walk-in queues crowded waiting rooms, patient history was scattered, and revenue lived in separate systems.

The solution

Multi-doctor scheduling with live token tracking, unified patient records, and video consultation with billing.

WHAT CHANGED

One system for booking, records, consultation and revenue, in the clinic and online.

Technology stack

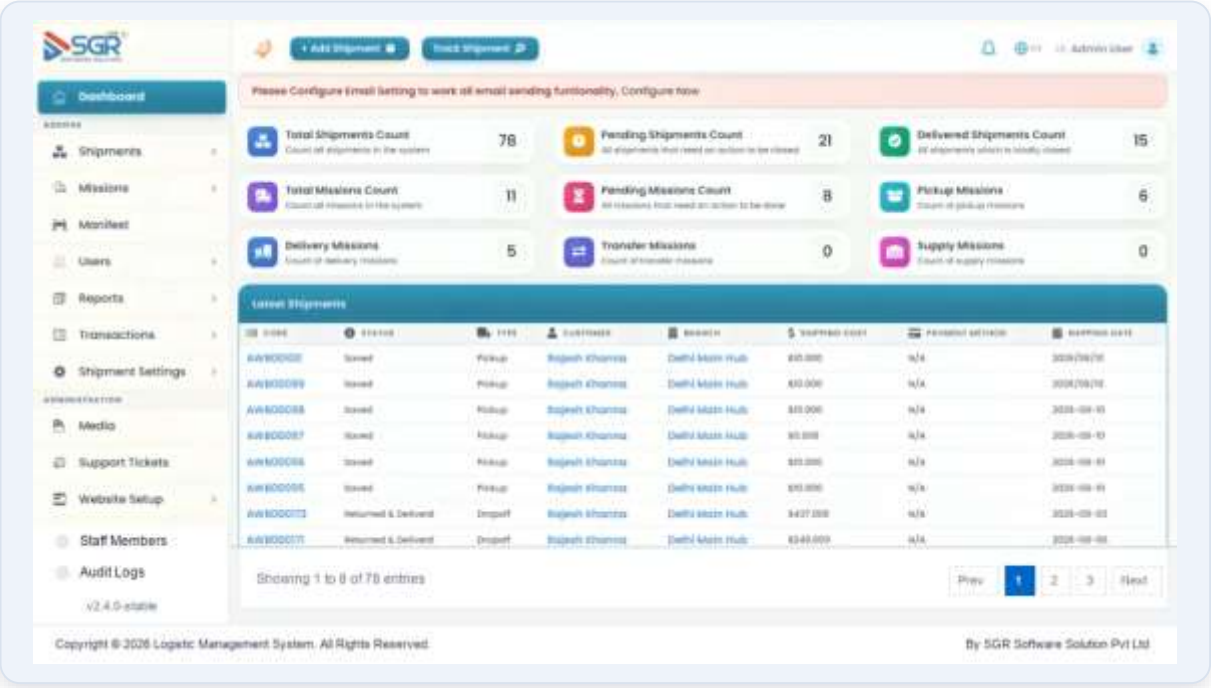
Next.js · Node.js · PostgreSQL · Tailwind · WebRTC · REST API

doctorhunt.sgrsoftwaresolution.com

CASE STUDY 03 · LOGISTICS & SUPPLY CHAIN

Logistic Management System

Fleet and shipment ERP



Illustrative interface

Key features

- Live fleet and shipment tracking
- Route planning and dispatch
- Barcode consignments, digital waybills
- Driver expense and billing automation

The challenge

No live view of the fleet, paper manifests between branches, and driver expenses processed offline.

The solution

Real-time tracking and dispatch, barcode checkpoints with digital proof of delivery, and automated settlements.

WHAT CHANGED

Paper manifests and offline settlements replaced by one tracked, reconciled workflow.

Technology stack

Laravel · Vue.js · MySQL · Redis · Maps API · REST API

CASE STUDY 04 · HOSPITALITY & ANALYTICS

Restaurant Performance Report

Power BI executive dashboard

Illustrative interface

Key features

- Automated data pipelines
- Live KPI and revenue scorecards
- Drill-down to transactions
- Revenue forecasting

The challenge

Metrics were trapped in legacy databases and Excel files, and monthly reporting was slow and error-prone.

The solution

Automated pipelines from SQL and APIs into interactive Power BI dashboards with alerts and forecasting.

WHAT CHANGED

Manual Excel reporting replaced by live dashboards leadership can explore on their own.

Technology stack

Power BI · Python · SQL · Excel

INDUSTRIES

Domain experience that speeds up delivery

DELIVERED

Healthcare

Clinic and hospital platforms: scheduling, records, teleconsultation, billing.

Doctor Hunt · Warke Dental

DELIVERED

Solar & Energy

Operations, ticketing, AMC and warranty tracking, financing workflows.

GNX Power Solution

DELIVERED

Logistics & Supply Chain

Fleet tracking, dispatch, consignments and warehouse systems.

Logistic Management System

DELIVERED

Hospitality

Performance analytics and executive reporting for operators.

Restaurant Performance Report

CAPABILITY

Education

Student portals, exam engines and learning apps.

References on request

CAPABILITY

Manufacturing

Material and inventory ERP, quality tracking, production dashboards.

References on request

DELIVERY PROCESS

A clear path from idea to live system

01 Discovery

Workshops on goals, users and systems before any code.

02 Planning

Scope, roadmap and sprint plan agreed up front.

03 UI/UX Design

Prototypes you approve before development.

04 Development

Agile sprints with regular demos.

05 Testing

Functional, performance and security testing.

06 Deploy & Support

Smooth go-live and SLA-backed support.

Communication

- Dedicated agile team
- Weekly progress updates
- Sprint demos, shared roadmap

Quality assurance

- ISO 9001:2015 quality processes
- Functional, performance, security tests
- Multi-device and API validation

Ongoing support

- Monitoring and security patches
- Performance tuning, enhancements
- SLA-backed maintenance
